

## Environmental Sustainability Policy.

At **Abi Nursery** we wish to support children to learn about sustainable practices and foster respect and care for living and non-living environments.

Children are able to develop positive attitudes and values about sustainable practices by exploring solutions to environmental issues, learning about the world around them and how to protect it and watching adults role model sustainable practices.

We promote a holistic, open-ended curriculum which explores ideas and practices for environmental sustainability and helps children understand the interdependence between people and the environment by:

- Helping children to explore nature through art and play
- Supporting children to experience the natural environment through natural materials like wood, stone, sand and soil.
- Supporting the environment by learning how to grow and nurture plants in the nursery garden and discovering all about the food cycle by growing, harvesting and cooking food for our nursery menu
- Helping children to learn about water conservation, energy efficiency and waste reduction through play-based activities and adult interactions
- Encouraging parents and children to regularly walk to nursery to raise the awareness of caring for the planet

As a nursery we will embed sustainability into all aspects of the operations including:

- Considering our carbon footprint when purchasing materials
  - Shopping local where possible
  - Turning off equipment and lights when not in use
  - Using energy saving light bulbs
  - Not leaving any equipment on standby
  - Unplugging all equipment at the end of its use/the day
  - Composting food waste
  - Incorporating water-wise strategies such as ensuring taps are turned off and leaks fixed
- 
- Recycling water from the water play to water plants outside

Working together with all our parents and partners will help our environment to be more sustainable and make it a better place for our future generations to grow up in.

We assess our nursery's impact on the environment on a regular basis and put procedures in place to counteract this impact.

In order to encourage children not to waste food or to play with food at mealtimes, we discourage the use of food as a play material; instead, we encourage activities which involve preparing and tasting different types of food.

This policy is reviewed annually and is carefully considered in the best interests of the children, nursery and the environment.
